DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ralph A. Dowell on August 3, 2004.

Attorney agreed to cancel the claim 2, and amending the claim 1.

Claim 1 (Amended) An optical lens for projecting light from a high power light emitting diode, the lens including a body having a front face and a rear face and a continuous curved side wall which is symmetrical with respect to a central axis of the body extending between said rear face and said front face, a cavity extending into said rear face of said body coaxially aligned with said central axis of said body for cooperatively receiving a hemispherical cover of a high power light emitting diode source therein so that substantially all light from the high power light emitting diode source enters into said body , and an inner surface of said side wall being reflective and configured such that light from the high power light emitting diode source is projected through front face in a non-collimated pattern; and wherein said inner surface of said

Art Unit: 2873

side walls is of a configuration such that light is projected from said front face of said lens at a beam angle of between 5° to 30° with respect to said central axis.

Allowable Subject Matter

2. Claims 1, 3 – 20 are allowed.

3. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in a combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 15, and 19 for example which include, a beam angle of between 5° to 30° with respect to central axis (claim 1); and an optical lens for projecting light from a high power light emitting diode, a lens including a body having a front face and a rear face and a continuous curved side wall which is symmetrical with respect to a central axis of the body and a non-optical guide flange extending radially from side wall relative to central axis and an annular non-optical lip extending radially outwardly relative to the front face of the body (claims 15 and 19).

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mohammed Hasan whose telephone number is (571) 272-2331. The examiner can normally be reached on M-TH, 7:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Georgia Epps can be reached on (571) 272- 2328. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
